

PRACTICAL GUIDE · 12 PAGES

SIX AGENTS AND ONE BOSS

Six prompts to build your importer outreach team
in Claude. You approve every message.

THE TEAM AND HOW IT CHAINS

Each agent does one job and hands the result to the next. What comes out of the Watcher goes into the Researcher. What comes out of the Booker goes into your diary.

THE WATCHER

Spots the buying
signal

THE RESEARCHER

Reads the importer
before you write

THE WRITER

Drafts the first
email to your rules

THE FOLLOW-UP

Runs day 3, 7 and
15

THE SORTER

Splits the yes from
the not now

THE BOOKER

Turns a yes into a
slot in your diary

The seventh is you. Nothing goes out unread.

YOUR BRIEF WRITTEN ONCE

Fill it in once. Paste it on top of every prompt.

Winery: {name, region, size}

What I sell: {wines, formats, price tier, in one line, no adjectives}

To whom: {importer or distributor type, channel, size, who decides}

Markets: {countries I want to sell in}

Signals I care about: {e.g. added a region to the portfolio, hired a new buyer, exhibiting or visiting {fair}, opened a new channel, posted a producer search}

What I have tried that did not work: {one or two lines}

How I write: {e.g. first names, short sentences, no adjectives, no emojis}

What I never say: {e.g. passion, award-winning, family estate, premium}

My booking link: {calendar link}

If one line is hard to fill in, start with that one.

THE WATCHER SPOTS THE SIGNAL

What you paste: your brief and a fair or a market.

Here is my brief: {brief}

Search the web for importers and distributors that match "to whom" in my brief and that in the last 90 days have shown one of my signals: they appear on the exhibitor or visitor list of {fair}, they added a region or a category to their portfolio, they hired a new buyer or commercial director, they opened a new channel, or they posted that they are looking for producers.

Give me a table with 10 rows: company, country, signal, date, the link where you saw it, why it fits my brief, and a score from 1 to 5 for how close they are to buying.

Only companies you can back with a real link. If you find fewer than 10, give me what you have and tell me what you searched. Do not fill the gaps with guesses.

You get a table you can paste straight into a spreadsheet. Careful: turn on web search in Claude first, and open three links at random before trusting the rest.

THE RESEARCHER READS THE IMPORTER

What you paste: one row from the Watcher and, if you have it, the person's LinkedIn About section, copied by hand.

Here is my brief: {brief}

Company to study: {importer, country, website}. Person: {name and role}. Their LinkedIn About section says this: {pasted text}.

Search their website, the trade press and public registers, and write a one-page file with four blocks:

1. Three facts about the company that matter for what I sell, each with its link. Portfolio gaps count.
2. One line the company or the person has said in public (interview, press note, post), in quotes and with the link.
3. What has changed in the last six months.
4. The angle: in two lines, why it would make sense for me to write now, and what I would ask for.

If you cannot find something, write "not found". Do not fill the gaps with what usually happens at similar importers.

You get the file that feeds the Writer. Careful: LinkedIn does not let Claude in; you copy the profile and paste it. Without that text the file comes out thin.

THE WRITER

DRAFTS DAY 0

What you paste: the Researcher's file.

Here is my brief: {brief}

Here is the company file: {Researcher's file}

Write the first email to {name}. Rules:

Open with something of theirs: the line they said or the thing that changed. No "hope you are well" and no introduction of my winery.

One idea for their list, in two or three sentences.

One small request at the end: a yes or a no, or a question they can answer in one line.

Between 80 and 120 words. Plain text. No adjectives about me, no attachments, no links, no tasting notes.

Write the way my brief says under "how I write" and use nothing from "what I never say".

Give me the subject line (six words at most, no title case) and the body. Then, on a separate line, tell me which fact from the file you used and which you left out.

You get the day 0 email. Careful: read it whole before sending. If there is a sentence you would never say, change it and add the rule to your brief.

THE FOLLOW-UP

DAY 3, 7 AND 15

What you paste: the day 0 email and the reply or the silence. With Claude connected to your inbox, it checks itself.

Here is my brief: {brief}

This is the email I sent on day 0: {email}. It has been {3 / 7 / 15} days. If you have access to my inbox, check whether they replied; if not: {they replied this: ... / they have not replied}.

Write the next email in the sequence, with this rule:

Day 3: one idea for their list that was not in the first email. Ask for a yes or a no.

Day 7: a new reason to write: a producer like me in their market, or a number from their market, with the source. Ask who else decides.

Day 15: the clean exit. Give them permission to close the file without feeling bad. Ask them to close or to name a date.

Between 40 and 80 words. No sentence repeated from the previous email. No reproach for not replying. One request only.

If they replied, do not write the sequence: tell me to stop and hand the reply to the Sorter.

You get one email at a time. Careful: day 7 is the one that drops when the week fills up. With Claude connected to your inbox (Customize > Connectors) it skips the copy and paste. The full sequence is in The 3-7-15 Protocol.

THE SORTER

YES OR NOT NOW

What you paste: the week's replies, all in one go. With Claude connected to your inbox, ask it to read them itself.

Here is my brief: {brief}

Here are the replies I received this week, separated by "---":
{replies}

Sort each one into exactly one of five labels: WANTS TO TALK, QUESTION, NOT NOW, NO, OUT OF OFFICE.

Give me a table: name, company, label, the exact sentence that made you decide, and the next step in five words or fewer (for example: "hand to the Booker", "answer the question", "come back in {month}", "close the file", "resend day 3 in 5 days").

Rules: a "not now" with a date or a reason keeps that reason in the table. A polite no is a NO, not a NOT NOW. If you hesitate between two labels, give me both and explain the doubt in one line.

Do not reply to anyone. Sort only.

You get Monday's list. Careful: a "not now" with a date is worth more than a "wants to talk" without one. Put the date in the calendar the same day.

THE BOOKER

FROM YES TO A SLOT

What you paste: a reply labelled WANTS TO TALK and your free slots for the week.

Here is my brief: {brief}

This person replied that they want to talk. Their reply: {reply}.
The thread so far: {emails}.

My free slots: {day and time, day and time, day and time}.

Write the reply that books the call. Rules:

Open with what they said. Thanks can come after, if at all.
Offer two concrete slots with day, time and time zone, and add my booking link in case they prefer to pick: {link}.

Say in one sentence what we will talk about and how long it takes: {20 / 30} minutes.

If they asked a question, answer it before proposing the time. If they asked for prices, do not put them in writing: say we go through them on the call with their numbers in front of us.
Between 50 and 90 words. No exclamation marks.

Then tell me, on a separate line, what I should prepare before that call.

You get the reply and your homework for the call. Careful: answer the same day. A "wants to talk" that waits until Monday is a "not now" by Tuesday.

IN WHAT ORDER AND HOW LONG

Ten importers are an afternoon on day one and an hour a week after that, roughly.

-
- ☐ Watcher: you give it the brief and a fair. It gives you 10 importers with signal and link. About 15 minutes per batch.
 -
 - ☐ Researcher: you give it one row and the pasted profile. It gives you the one-page file. About 10 minutes per importer.
 -
 - ☐ Writer: you give it the company file. It gives you the day 0 email. About 5 minutes per email.
 -
 - ☐ Follow-up: you give it the email and the reply or the silence. It gives you day 3, 7 or 15. About 5 minutes per email.
 -
 - ☐ Sorter: you give it the week's replies. It gives you the table with label and step. About 10 minutes per week.
 -
 - ☐ Booker: you give it one "wants to talk" and your slots. It gives you the reply with two times. About 5 minutes per call.
 -
 - ☐ Claude sends nothing. You send, from your own email, after reading it.
-

SO YOU STOP PASTING THEM

Each prompt can be saved in Claude as a "skill": a file with the rules of one job that Claude reads only when you call it by name. Four steps, no code.

STEP

1

TURN IT ON

In Claude, go to Settings > Capabilities and turn on code execution.

STEP

2

ASK FOR THE FILE

Paste into a chat: "Turn this prompt into a skill. Give me the SKILL.md file with a name, a description of when to use it, and the instructions." Then the agent's prompt underneath.

STEP

3

SAVE AND UPLOAD

Create a folder named after the agent, save the SKILL.md inside and zip it. In Claude: Customize > Skills, the + button, "Create skill", "Upload a skill".

STEP

4

TEST

Open a new chat and write: "Use the watcher skill with this fair: ...". If something fails, fix the file and upload it again. Third time usually sticks.

IF YOU WANT THIS TO KEEP RUNNING

The six prompts work by hand. The hard part is keeping them going the week three orders and a fair land at once.

Agent DM+ is this same team, already trained and chained: it sources by your filters, researches, writes to your rules, keeps the cadence you set, reads the replies and shows you every message before it goes out. You approve, it sends.

Reply **"CALL"** and we look at it in 20 minutes
